

The Dayton Power and Light, Co.

Design . Bid . Build • Aberdeen, Ohio

Project Scope:

IPS fabricated large bore piping for the Dayton Power and Light tank farm which serviced the JM Stuart 2,400 megawatt powerplant in Aberdeen, Ohio. IPS fabricated and installed 24", 16" and 10" Schedule stainless pipe. This was a specialty fit-up between existing tanks and new product distribution lines throughout the plant. IPS was responsible for the design variation and fabrication of the spool pieces.

Project Duration: 2 Months

Project Cost: \$500,000

POWER/ENERGY
