

Bowling Green State University

South Tunnel Renovation • Bowling Green, Ohio

South Tunnel Renovation:

A \$6.5 million renovation project for Bowling Green State University (BGSU) South Tunnel began in May of 2008. This project will also include upgrades and renovation to the tunnel servicing points from the Centrex Building to the Harshman / Kreischer residence hall complex.

General Project Scope:

The renovations included the replacement of the highly deteriorated tunnel tops and relocation of a tunnel water main. IPS pipe fitters increased the water main to a size of 12 inches.

Challenges:

The primary challenge of the project was making sure the project and construction did not interfere with students due to closed parking lots and driveways as well as water replacement disruptions

Project Facts

Project Duration
10 Months

Total Project Cost
\$3.8 Million
