

Spartan Steel Coating Company

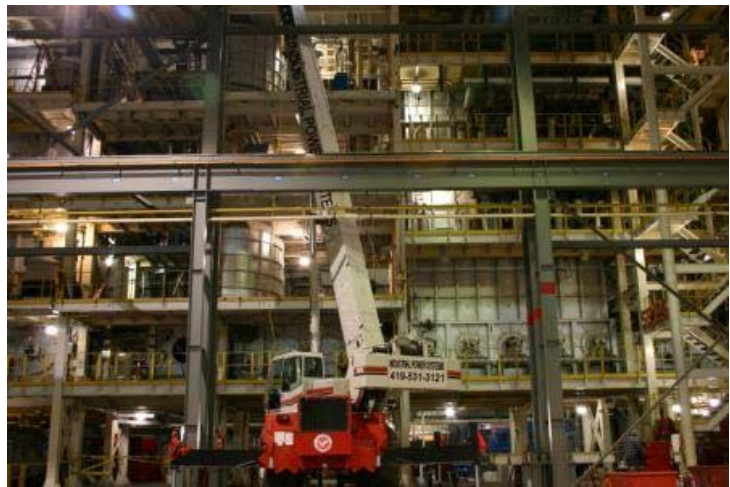

Design . Bid . Build • Monroe, Michigan

New Furnace Rebuild

Spartan Steel Coating is a joint venture between Severstal North America and Worthington Industries. Located in Monroe, Michigan, Spartan Steel Coating Company is capable of producing 450,000 tons annually of light gauge hot-dipped galvanized steel, primarily for value-added automotive applications.

Project Scope

IPS was the General Contractor for the construction of the Cooling Water Plant and Furnace Upgrade at the Spartan Steel Coating Company in Monroe, Michigan. IPS was responsible for all civil, structural, architectural, electrical, plumbing and process piping, HVAC and controls for the cooling water plant. For efficiency modification of an existing hot dip coating line, IPS self-performed white iron erection, piping, electrical, controls, equipment setting and large ductwork.
